-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

Drawings

The drawings are objected to because Figure 2 is labeled "PRIOR ART" however it is referred to as the "preferred embodiment" in the specification (page 3, line 20-24).. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Schumacher (5,392,204). Schumacher discloses a lampshade assembly comprising a main cover body [18] surrounding a receiving space and formed with a light emanating portion [30] defining at least one opening. A reflector shroud [20] is mounted on the cover body [18] and is spaced apart from the light emanating portion [30] to define a space.

Allowable Subject Matter

Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior art made of record fails to show or suggest a lampshade assembly comprising a main cover body surrounding a receiving space and formed with a light emanating portion defining at least one opening and a reflector shroud is mounted on the cover body and is spaced apart from the light emanating portion to define a space wherein the main cover body has a cone shaped wall and the light emanating portion is in the intermediate portion of the wall.

Prior art made of record also fails to show or suggest a lampshade assembly comprising a main cover body surrounding a receiving space and formed with a light emanating portion

Art Unit: 2875

defining at least one opening and a reflector shroud is mounted on the cover body and is spaced apart from the light emanating portion to define a space wherein the inside of the shroud is coated with a heat resistant pigment layer.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
